

Existing intersection at R16 and F90

- Street light
- Future traffic signal
- Street trees
- Re-aligned intersection
- Crosswalk striping
- Detectable warning panel
- Proposed 10-ft trail

Proposed R16 and F90 intersection improvements

**Pedestrian Routes and Connectivity**

Multiple user groups participating in community assessments voiced a desire for more connected sidewalk and trail routes. Many identified the school, Van Meter Recreation Complex, downtown core, and Crestview subdivision as areas of focus for these connections. The proposed plan takes a comprehensive look at the existing pedestrian infrastructure and where trails or sidewalks need to be located to connect users to major destinations. These connections also provide over two miles of additional recreational trails.
