

Plan depicting proposed conditions of Peacock Park.

Alleman

Peacock Park

Peacock Park

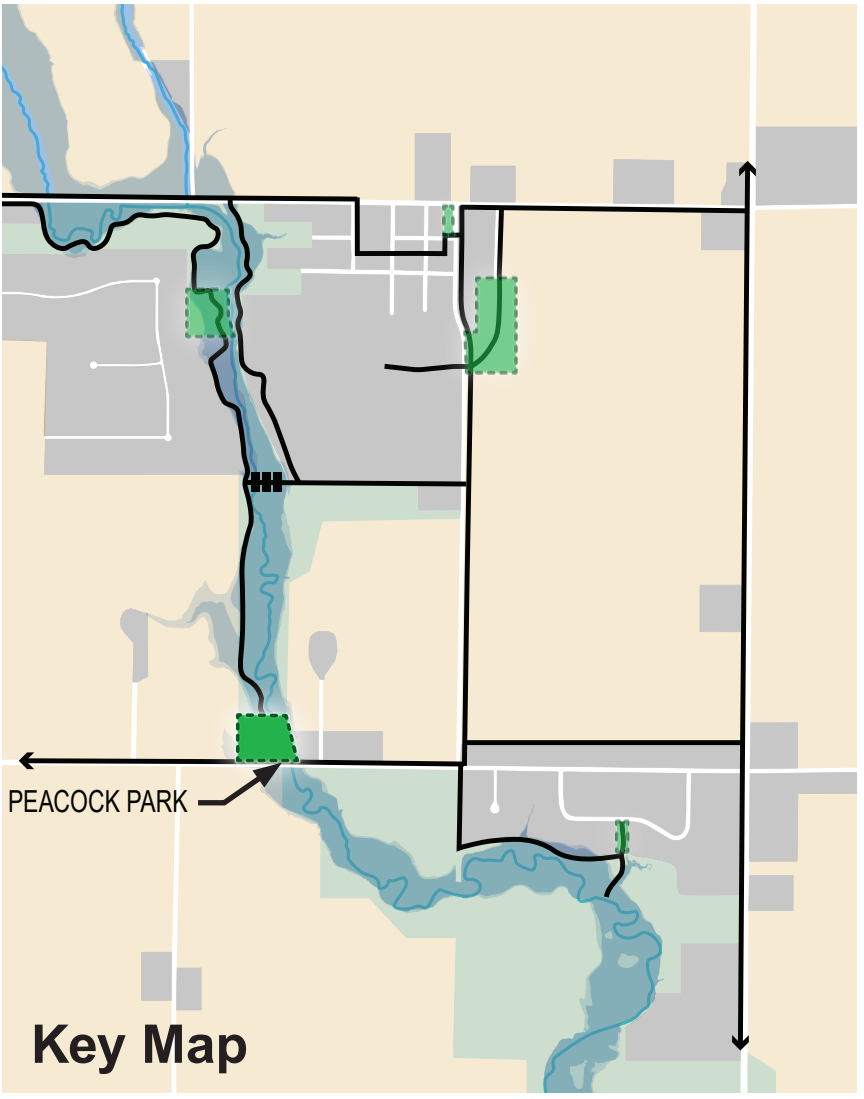

The proposed Peacock Park is situated north of NE 134th Avenue, next to Fourmile Creek. The trailhead and shelter serve as an entrance into the park, as well as a connection point to the paved trail leading north toward Timber Creek Park, and toward the housing development south of Dennler Drive.

A proposed canoe/kayak launch on the west side of the park provides access to Fourmile Creek and a variety of water activities.

A pedestrian foot bridge over Fourmile Creek leads to a mown trail on the east side of the park. Benches and signage allow visitors to rest and learn about the native planting area surrounding the mown trail. An overlook tower is also located along the mown trail path. This serves as an opportunity to take in panoramic views of Alleman and the surrounding area.
