Warning lights, safety crossing arms, and warning bells create safer crossing conditions for trail users. This creates physical, visual, and auditory traffic controls for pedestrians, cyclists, and vehicles on this shared-road portion of the trail. Overall safety at this intersection is improved.

NOTE: Each concept, priority, and time line are intended to be flexible as determined by the community. Phases and time lines are intended only to demonstrate how large-scale improvements can be achieved by implementing small-scale projects strategically over time to achieve broader reaching goals.
