

Case Study in Carroll, Iowa

The above park in Carroll served as a case study.

Example Pavilion/Farmers Market Structure

The Carroll Depot includes a large shade structure for various community events such as a farmers market. The plan for Coon Rapids also incorporates a pavilion to draw people in and activate the space.

Activated Gathering/Plaza Space

The steering committee identified the need for a community gathering space. A potential location identified for the space was the existing gravel parking lot located south of Railway Street between S. 6th Ave and S. 5th Ave.

This proposed plan rejuvenates the space by transforming it into an active recreation space with a stage/performance area, farmers market pavilion, play area, viewing mound, and open lawn area. The plan provides direct access to the bowling alley, as well as the Downtown/grocery store.
