Feldhan Park Expansion:

Feldhan Park is one of Durant's many assets. It currently has a looped trail system, restored prairie, picnic shelters, and baseball fields for community games. The trail is lined with trees and there are benches throughout the park.

Based on the public input received, the following needs were identified: more sports fields, more playgrounds for children, and more parking spaces. The proposed concept plan addresses these needs and desires as well as issues and opportunities that the design team observed during the site visit.

The goal of the concept plan is to create a functional and cohesive park that is reflective of the needs and desires of the community and does not look like it was planned and developed in a piecemeal fashion. It is the intent to preserve and enhance the existing park, while expanding and creating recreational features and opportunities for the new undeveloped expansion area. The drawing notes to the left highlight the proposed elements and the photos in the upper right show examples of some of the proposed amenities.
