

School Bus Shelter

Farragut's youth attends school in both Shenandoah and Sidney. Currently, students waiting for the bus to commute to Sidney have to wait along the edge of the street on New Orleans Avenue, which experiences fast-moving traffic. Focus-group participants noted the need for a safe school bus stop at this location

The school bus shelter provides a secure space off the street's traveled way for students to wait for the bus and helps protect the students from inclement weather and creates a social gathering space.

In addition to the bus stop shelter, other amenities include marked crosswalks, improved sidewalks, added sidewalks, signage, and ornamental plantings around the paved bus stop area.
