

A) Three Rivers Trail

B) Community Bike Lanes

C) City Park

D) Downtown Enhancements

Concept Plan Overview

The committee was very pragmatic in creating goals on which they could build a strong foundation and implement through phasing based on community size and funding available.

The committee gathered additional feedback during a workshop at the farmers market where 30+ individuals from the community commented on possible trail routes, amenities, and enhancements for the community. The design team created a digital survey for distribution online through Gilmore City's Facebook page and at events throughout the community, soliciting several additional responses in support of the proposed design concepts.

The images on this board reflect these major themes and project locations as expressed throughout the project priority-setting process. The committee prioritized project areas based on the What, Where, & Why findings and focused on projects that achieved goal from multiple themes.

Themes identified by the committee include:

-  Pedestrian Amenities
-  Trails
-  Community Amenities
-  Safety and Accessibility
