

# How Often People Walk

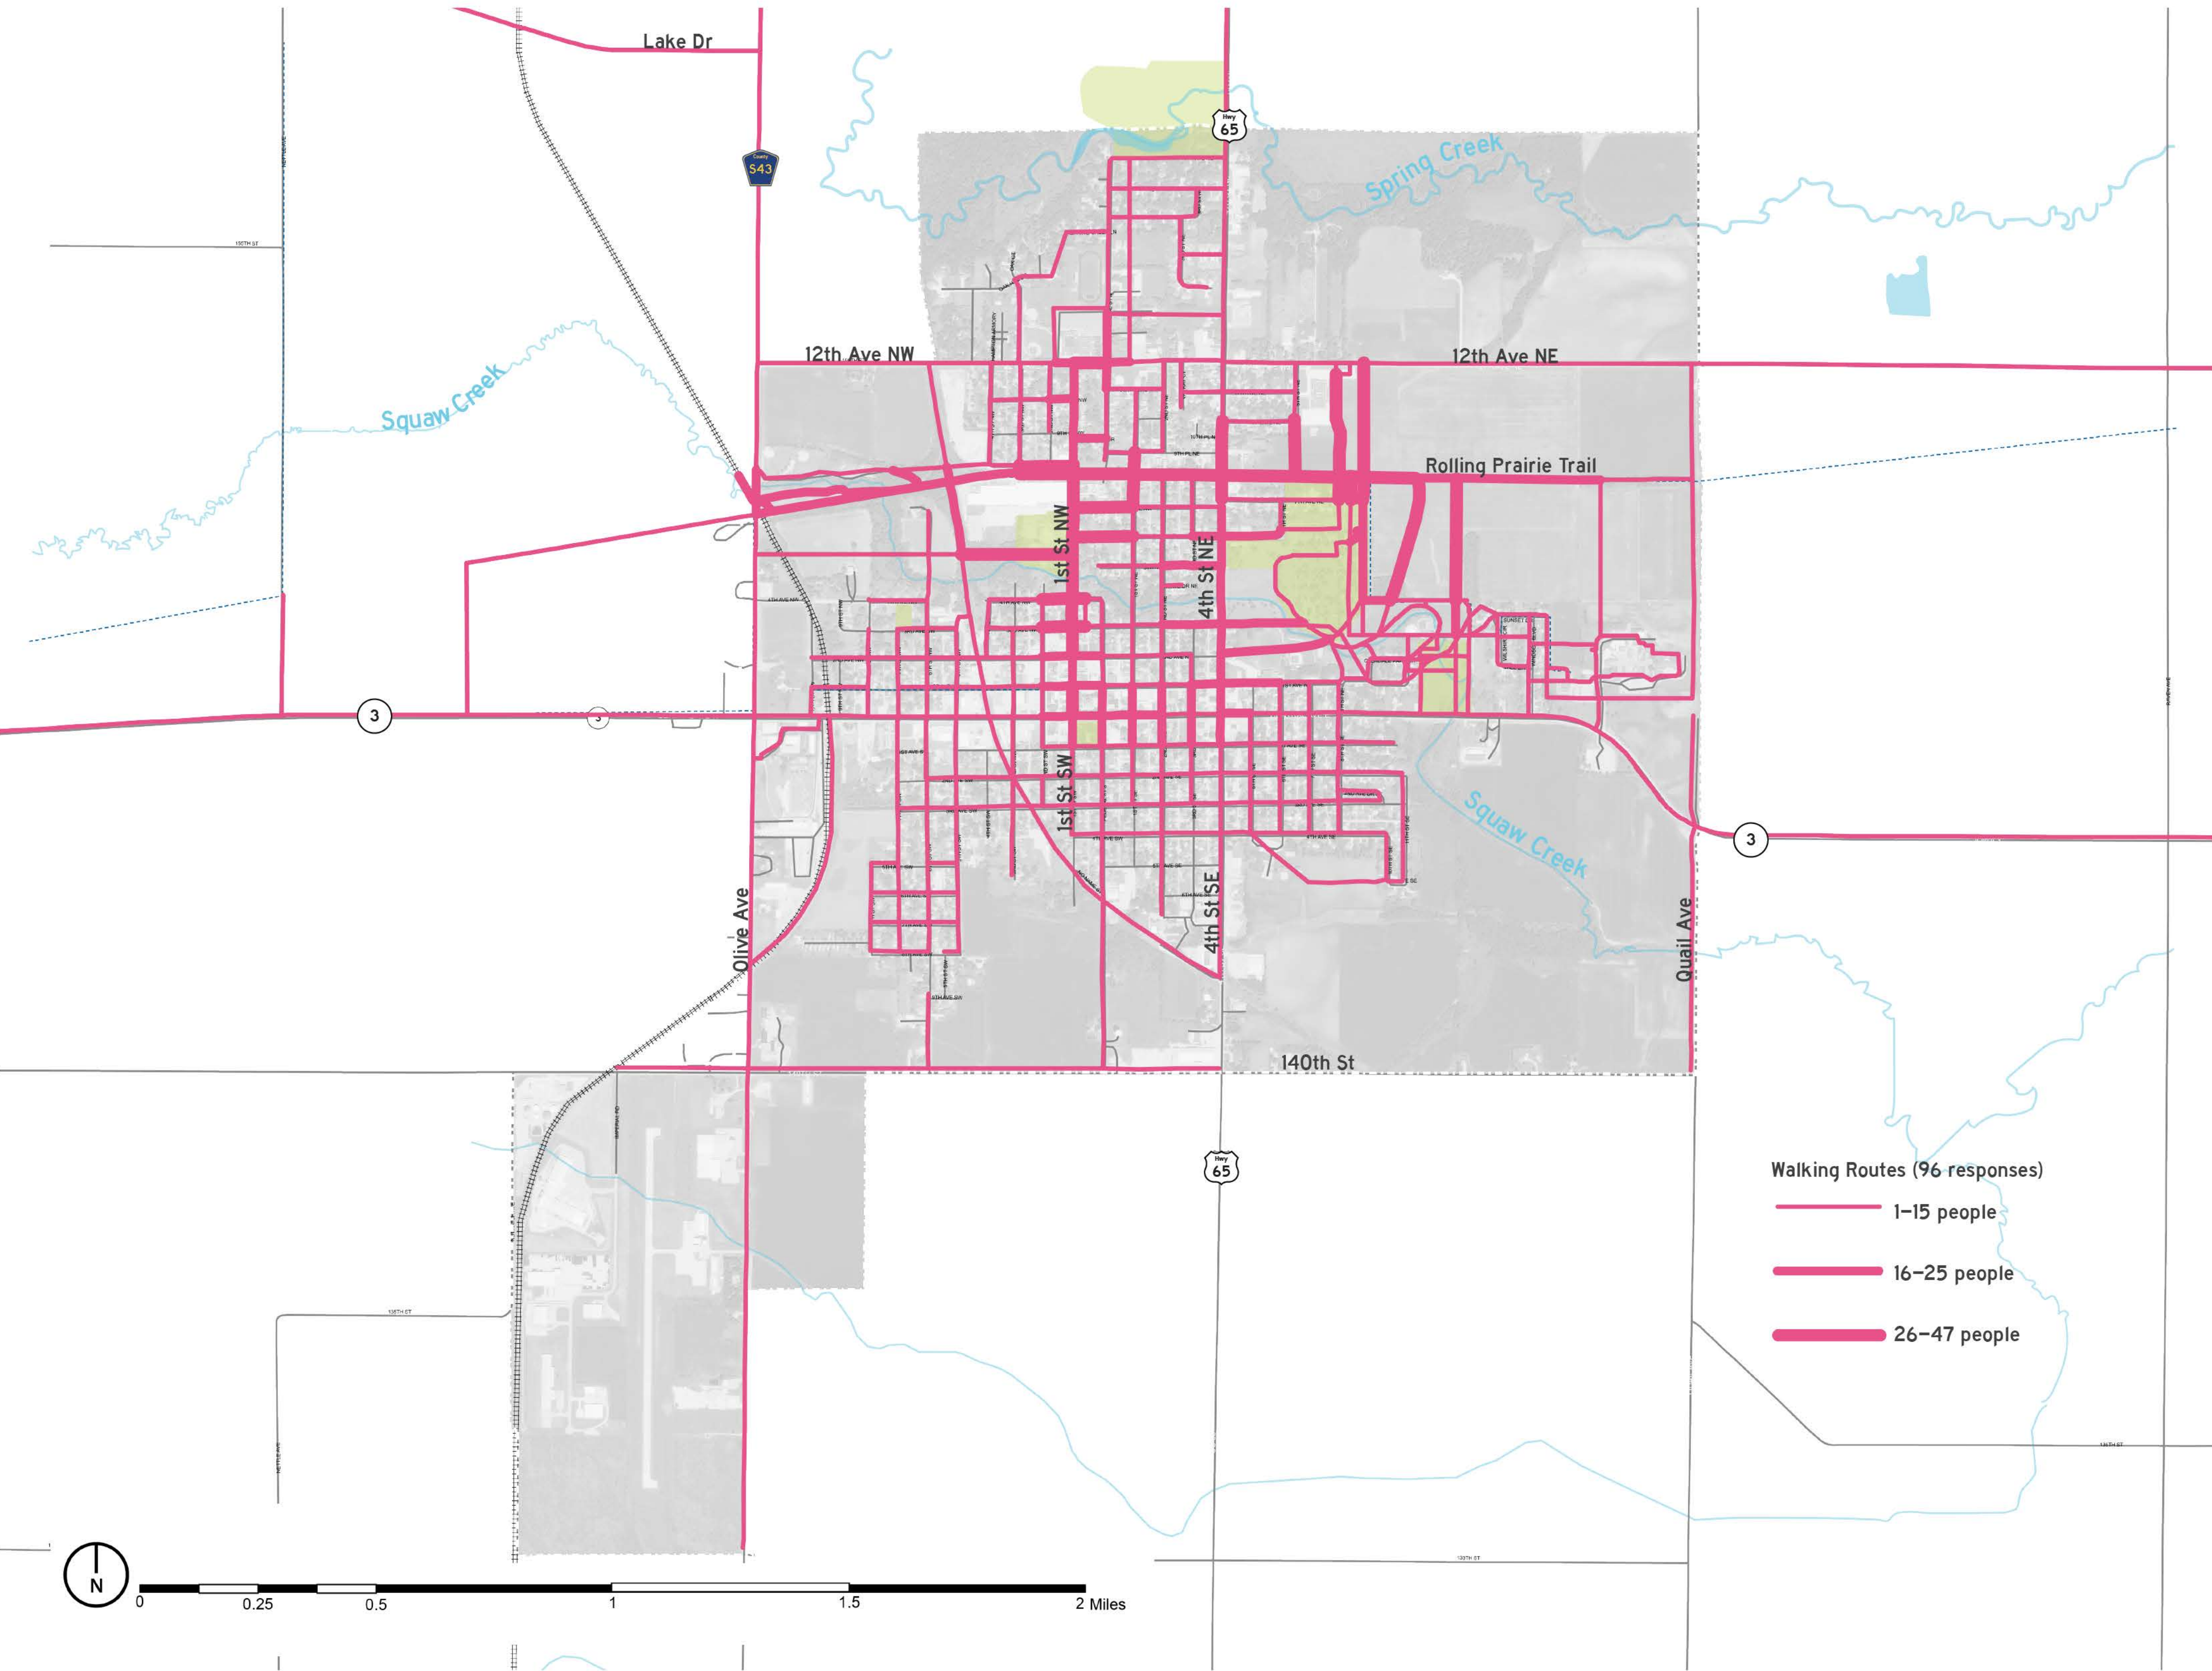

How Often Did You Walk During the Past Year? (168 responses)

Survey participants were asked how often they walked during the past year. More than 98% of respondents answered this question. Of those people, approximately 82% indicated that they walked. The highest percentage of survey participants (20.2%) walked at least three times a week. More than 17% walked weekly, and nearly 15% walked daily. More than 77% of survey participants indicated that they would walk more frequently during warmer-weather months.

# Where They Go

This map shows the walking routes identified by 96 survey respondents. The frequency that the routes are used is depicted by their thickness, with most frequently used routes being the thickest. The Rolling Prairie Trail through town is the most popular route among walkers. From the trail, people can access the middle school, the cemetery, and the wellness center without encountering any vehicular traffic. Walkers use nearly all the city streets in Hampton, most frequently the streets in the downtown area and near Progress Park. Some people walk along the highways, and some people walk County Road S43 to get to Beed’s Lake. A number of survey participants also walk along both the existing and former rail lines.
