

Map Source: Iowa Department of Natural Resources, "Natural Resources Geographic Information Systems Library," accessed October 2015, <http://www.igsb.uiowa.edu/nrgislibx/>. Route data derived from the 2016 Designing Livable Communities survey conducted by Iowa State University.

# How Often People Bike

How Often Did You Bike During the Past Year? (166 responses)

Survey participants were asked how often they biked during the past year. More than 96% of respondents answered this question. Of those people, just over 31% indicated that they biked. More than two-thirds of respondents did not bike. Just over 11% of respondents biked less than once a month. Just over 7% of respondents biked monthly and more than 8% biked weekly. One-third of survey participants indicated that they would walk more frequently during warmer-weather months.

# Where They Go

This map shows the biking routes identified by 49 survey respondents. The frequency that the routes are used is depicted by their thickness, with most frequently used routes being the thickest. Cyclists ride on many of Hampton's streets. Like the walkers, most of the survey participants bike on the Rolling Prairie Trail through town, as well as out of town to the west. Several survey participants bike on County Road S43 to Beed's Lake, and some bike north on US Highway 65 to Harriman Park and beyond. Some people bike a loop consisting of 12th Avenue, Quail Avenue, 140th Street, and Olive Avenue. Cyclists also ride south out of town on US Highway 65.
