

Where They Go

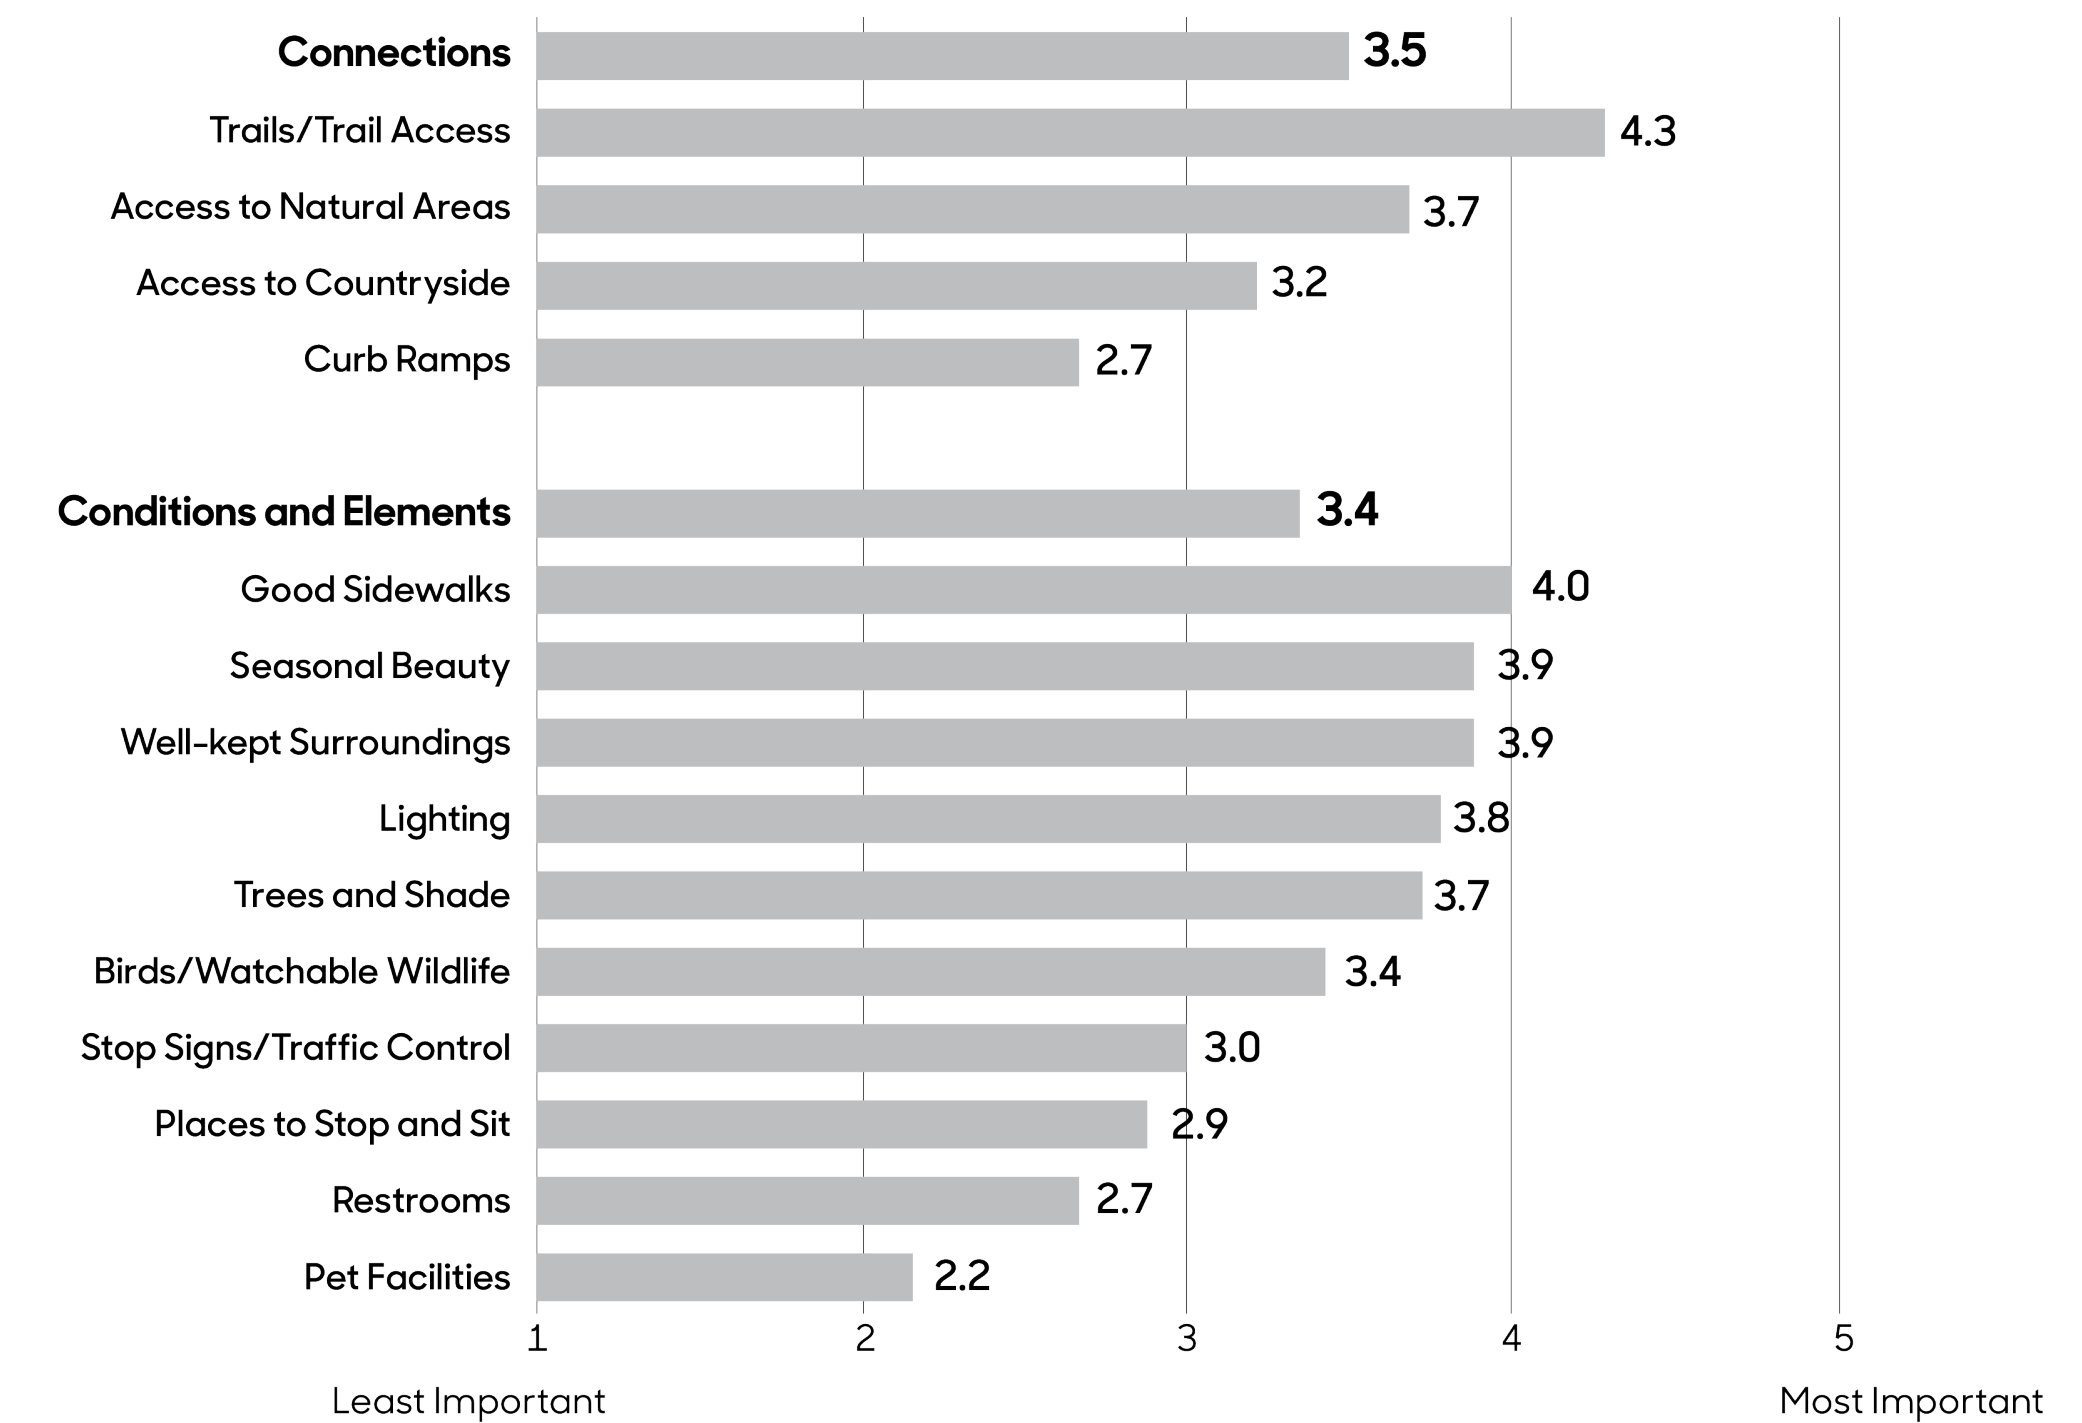

This map shows the walking routes identified by 57 survey respondents. The frequency that the routes are used is depicted by their thickness, with most frequently used routes being the thickest. Cottonwood Trail is clearly the most popular walking route in Humboldt, followed by the Gotch Park and Three Rivers Trails. In town, participants indicated that they walk the grid of streets throughout town. The most frequently walked streets in town are Sumner Avenue and the streets connecting to the three trails.

Why They Go That Way

On a scale of 1 to 5, with 5 being the most important, survey participants ranked the characteristics and features that made their walking experience better. These features are categorized as either "connections" or "conditions and elements." Among Humboldt participants, connections and conditions/elements have nearly equal importance with mean values of 3.5 and 3.4, respectively. In terms of connections, access to trails is most important with a mean value of 4.3. Good sidewalks are the most important element to walkers (4.0), followed by seasonal beauty and well-kept surroundings (each with a mean value of 3.9).
