

Map Source: Iowa Department of Natural Resources, "Natural Resources Geographic Information Systems Library," accessed October 2015, <http://www.igsb.uiowa.edu/nrgislib/>. Route data derived from the 2016 Designing Livable Communities survey conducted by Iowa State University.

How Often People Bike

How Often Did You Bike During the Past Year? (169 responses)

Survey participants were asked how often they biked during the past year. More than 96% of respondents answered this question. Of those people, approximately 36% indicated that they biked. Nearly two-thirds of respondents did not bike. Just over 18% of respondents biked less than once a month. Only one respondent biked daily. These findings are consistent with comments made during the focus groups and on the survey regarding the lack of designated bike routes.

Where They Go

This map shows the biking routes identified by 36 survey respondents. The frequency that the routes are used is depicted by their thickness, with most frequently used routes being the thickest. Cyclists ride on many of Kalona's streets. Like the walkers, most of the survey participants bike north of Highway 22, primarily on H and J Avenues, and 3rd, 4th, 5th, 6th, 7th, 10th and 11th Streets. South of Highway 22, people bike on the city streets, especially in the downtown area. Some people bike along Highways 22 and 1, as well as Nutmeg and Maple Avenues both north and south of town. A few cyclists continue west of town from Highway 1 on 110th Street.
