

Project Opportunities by Theme

The Logan visioning committee identified a number of goals and priority areas during the visioning process, which included forming a community identity through entry signage and historic markers, improving the pedestrian experience within Logan's business district, creating safe routes to school with established trails, and addressing bicycle-pedestrian safety concerns through safer highway crossings. These themes, along with public input received at the design workshop, guided the development of the concept plan below.

Community Identity

The steering committee identified three main entrances into Logan that reflect significant traffic patterns entering town. The goal of the entry signage design is to establish consistent branding to attract new businesses and residents to Logan.

This concept is further explored in boards 8a-c, and additionally referenced in the following boards: 9c, 10a-b.

Improved Business District

This redesign of US Highway 30 will benefit the main corridor of businesses and traffic in Logan. Adjusting the existing road width to introduce amenity spaces and vegetation will create pedestrian-friendly spaces for the community to shop, gather, and celebrate Logan's historic character.

This concept is further explored in boards 9a-c, and additionally referenced in the following boards: 8a, 8c.

Trails & Routes to School

The main goals of the trail system are to establish safe walking routes to the Logan-Magnolia schools and provide recreational amenities for the community. This layout considers public input, commonly traveled bike-pedestrian paths, and strategic places to connect to existing sidewalks and trails.

This concept is further explored in boards 10 a-c, and additionally referenced in the following boards: 8a, 8c.

Highway Crossings

Through both trails and streetscape improvements, this plan considers safer pedestrian crossings that will improve access and safety for non-drivers.

This concept is referenced in the following boards: 9a-b, 10a-c.
