

Desired Bike Route Features

On a scale of 1 to 5, with 5 being the most important, survey participants ranked the characteristics and features that made their biking experience better. These features are categorized as either "connections" or "conditions and elements." Among Madrid participants, connections are more important than conditions/elements, with mean values of 3.63 and 3.50, respectively. In terms of connections, access to trails is most important with a mean value of 4.45. Well-kept surroundings are the most important elements to cyclists, with a mean value of 4.00. Seasonal beauty (3.79), restrooms (3.75), and trees and shade (3.74) are also important features.

Desired Trail Features

On a scale of 1 to 5, with 5 being the most important, survey participants ranked the characteristics and features that made their trail experience better. Like the bike route features, they are categorized as either "connections" or "conditions and elements." Conditions and elements are more important to Madrid trail users than connections/elements, with mean values of 3.74 and 3.40, respectively. In terms of connections, access to natural areas is considered most important, with a mean value of 3.86. In terms of conditions/elements, little vehicular traffic (4.15) is the most important element, followed by well-kept surroundings (4.08), and restrooms (3.92).
