

Concept Overview

After meetings with the steering committee and other members of the community, the design team has proposed several concepts for Movable based on the goals identified. Below is an outline of the proposed concepts, which correspond to the map:

1.

Trails and Recreation

The design proposals calls for an expansion of the existing community trail in order to connect city parks and recreation areas, both within and outside city limits. The addition of a trail network will also address residents' desire to live in a walkable and bike-friendly Movable.
2.

Accessibility and Safety

There are many discontinuous sidewalks throughout the city. Movable wants to prioritize a sidewalk system with ADA accessibility, visible crossings, and sufficient lighting to provide equitable access to Movable's amenities.
3.

Way-finding and Signage

An attractive and cohesive signage scheme incorporates elements of existing community signage and enhancing Movable's visual appearance and legibility.
4.

Main Street and Downtown Revitalization

Improving both the accessibility and aesthetic of downtown Movable will gain attention of Movable residents and visitors. Way-finding signage will also help to direct visitors to downtown.
5.

Frontage Road Renovation

Frontage Road welcomes residents and visitors into the community. By beautifying this stretch of road with the addition of a bike trail and roadside plantings, Movable can signal to those passing by what the city has to offer.

Accessibility and Safety

Improve pedestrian safety and encourage walking and biking as healthier alternatives to driving by enhancing the sidewalk system.

Main Street and Downtown Revitalization

Create pedestrian-friendly environment and enhance aesthetics with the addition of street trees and bump-outs.

Trails and Recreation

Increase connectivity between community assets by enhancing the trail system.

Way-finding and Signage

Improve navigation and create a more cohesive community identity.

Frontage Road Revitalization

Enhance and improve access and aesthetics of community entrance road.
