Trail opportunity

Trail opportunity

“At one time they talked about having a trail from the landing... up to north of the business district... [It] would be nice to walk along and see the river.”

PHASE VI

This theme of this phase is to connect North and South Parks with a trail running along the Iowa River. The proposed trail connects the overlooks proposed at each of the dead-end roads and the overlook plaza outside the community center along the river as illustrated in Phases II and III. The trail can run on grade along public or downtown properties but should be lowered in elevation along the bank where it runs beside private properties or residential buildings. This ensures that views into yards are blocked and privacy is maintained. Meanwhile, property owners' views to the river will remain.

NOTE: Each phase, priority, and time line is intended to be flexible as determined by the community. Phases and timelines are intended only to demonstrate how large-scale improvements can be achieved by implementing small-scale projects strategically over time to achieve broader reaching goals.
