

## Primary Corridors

Primary corridors are streets that serve as main routes for motorists and pedestrians to points of interest throughout town. These primary corridors are the priority areas identified to receive lighting and sidewalk enhancements first; these are also the corridors where the way-finding signage will be located.

The concepts illustrated on this board focus on Toronto Street and Lincoln Highway, however, as shown on the **Concept Plan Overview** (board 6), Highway 30, Main Street, Park Street, and a portion of Vine Street and Jefferson Street are also considered primary corridors.

### Toronto Street

The illustrations of the concepts shown for the improvements for Toronto Street show two options. The second option is the same as the first option except that the overhead utility is placed underground and the road is redone with new pavement.

Following are the enhancements illustrated in the two different views of Toronto Street (refer to photo edits 11b, 11c, 11d, and 11e):

- Decorative vehicular and pedestrian lighting with two alternating types of decorative banners
- Way-finding signage
- Defining the "edge" of the roadway by removing expansive drives that are not needed (this also improves circulation and safety for both motorist and pedestrians)
- Demarcation of crosswalks
- ADA compliant sidewalks
- Grass boulevard
- Open ditch enhancement: removal of woody vegetation and invasive, noxious and otherwise weedy species and replace with native grasses and forbs tolerant of field conditions

Existing photo 11d: N. Toronto St.; photo taken south of intersection with Jefferson St., looking southerly

Existing photo 11g: Lincoln Highway; photo taken from Wheatland Manor drive way looking westerly

Photo edit 11b: Decorative lighting, ADA compliant sidewalks, and a managed ditch enhance the aesthetics of this important corridor.

Photo edit 11e: Decorative lighting, ADA compliant sidewalks, and a managed ditch enhance the aesthetics of this important corridor.

Photo edit 11h: Decorative lights with banners, ADA compliant sidewalks, and way-finding signage contribute to highlighting the importance of this corridor

Photo edit 11c: Concept illustrating the proposed enhancements with the overhead utility placed underground and new pavement

Photo edit 11f: Concept illustrating the proposed enhancements with the overhead utility placed underground and new pavement

### Lincoln Highway

The enhancements proposed for the Lincoln Highway corridor include the same as those listed for Toronto Street and are illustrated in Photo edit 11h.

Residents identified the importance of having a sidewalk or trail connect to Wheatland Manor. Providing ADA compliant sidewalks that are well lit will allow the community and residents of Wheatland Manor to safely walk around the neighborhood and other parts of town.

The enhancements also highlight the importance of this historic corridor to visitors.
